OUR VISION & MISSION

VISION -

We endeavour to be the pioneer in the aluminium wheel rim refurbishment industry focusing on technology, quality, and integrity.

MISSION -

Renuamag strives to provide integrated and innovative solutions to our clients by utilising the latest technology, best prices and recognised industry standards. Through our knowledge and significant experience in the industry, we add value to our client's operation and build long term relationships that are mutually beneficial.

QUALITY POLICY AND QUALITY CHECKS

Re-Nu-A-Mag is ISO 9001;2015 certified, with routine audits conducted by TÜV Rheinland.

We strive to achieve and maintain quality by:

Understanding our customers needs and expectations. Monitoring our performance in order to continually improve our processes and services.

The 17 processes that a rim passes through, are met with the highest quality paint removal, straightening, finishing, pre-treatments and painting techniques.

Various quality and safety procedures are instituted throughout the refurbishment process.

Our X-ray facility is the first and final step in maintaining our high quality and safety rating.

Every rim, upon entering the system, is size verified by a snap gauge measurement to filter out any undersized rims.

Every rim passes three visual check points throughout the refurbishment process, where the following is visually inspected: Paint removal, paint preparation, and wet spray finish.

In addition, various mechanical quality checks are done throughout the process of refurbishment: Run-out checks, leak testing, snap gauging and X-raying.

Every wheel that enters the plant is accepted on an individual job card number, stipulating exact wheel specifications, also all accessories to the rim and what service needs to be performed. This job specific number is engraved into the wheel and record is kept of the procedures done to the rim throughout the refurbishment process. We thus create procedure history for every rim which is traceable and kept on record for a period of 5 years.
